 - Framework presentation (ESCAP)
 - Roundtable on Sanitation (WTO)
 - Roundtable on Bangkok floods and impact on household water security (MWA, Bangkok)
 - Discussion on WWF-6 target
- Economic, Food and Water Security (1.5 h)
 - ESCAP
 - FAO
- Exhibition (Case studies, posters etc.)

6th WWF: Regional Targets

- ***1.1 Reduce by half the number of people who do not have access to safe drinking water and basic sanitation in our region by 2015 and to reduce that number to achieve universal and sustainable targets by 2025. On sanitation, this include the adoption of new and innovative sanitation systems that are not as water reliant as current methods.***

6th WWF: Regional Solutions

Subregion	Country	Best-Practices
Pacific	Republic of the Marshall Islands	Training local facilitators to empower households on drinking water safety plans
	Tonga	Rainwater Harvesting in Tonga
	Republic of Vanuatu	Improved water supply in Port-Vila Water Concession, Vanuatu
Central Asia	Republic of Tajikistan	A child-focused partnership for achieving WASH behavior change in Tajikistan.
South-East Asia	Indonesia	Sanitation by the community in Denpasar, Indonesia
	Republic of the Philippines	Wastewater treatment in Muntinlupa
		Access to Water in Manila Water Concessions
South and South-West Asia	India	ECOSAN in INDIA
		Linking Wastewater Management with Recreation
		Community Managed Water Supply & Sanitation Scheme
		Information, Education, and Communication Campaign for Decentralized Water and Land Planning and Management
	Nepal	Innovative Practices in Pro-Poor Water and Wastewater Management
		Sanitation and Hygiene in Nepal

6th WWF: Regional Solutions

Subregion	Country	Best-Practices
Pacific	Fiji	The Sanitation Park Project: A regional initiative to increase participatory approaches in the sanitation sector
North-East Asia	Republic of Korea	Innovative solar disinfection for low-cost and socially acceptable potable water supplies from rooftop harvested rainwater
South-East Asia	Viet Nam	To their credit: How three Mekong Delta towns have used revolving funds to increase coverage of septic tanks
South and South-West Asia	India	PAN IN THE VAN – An innovative On-site Approach for Inclusive Wash
	Nepal	Sustainable Total Sanitation with Water Safety Plan: Initiatives of Nepal

UN-Water

- Regional Task Force
 - ESCAP & ESCWA co-leading on regional approaches to water resources management
 - assess the ways that "regional coordination" happens on water-related activities for greater complementarity and coherence
- UN-Water Rio + 20 statement: Focus on:
 - Scaling up Green Economy approaches
 - Integrated Management of water
 - Monitoring targets
 - Universal water supply & sanitation
- Preparations for IFAT 2012

Thailand Floods

- Post Disaster Needs Assessment
- Water supply infrastructure
- Wastewater: Flood & wastewater issue

Geographical Extent: 26 Provinces
